Expert Summary

Motivated and detail oriented Computer Science student with strong interests in Operations and Project Management within digital business environments. Experienced in coordinating theoretical team projects, organizing workflows, communicating across teams, and ensuring timely task completion under pressure. Meaning in problem solving, task coordination, communication, and structured project execution. Fervid about teamwork, functional efficiency, continuous learning, and contributing to high performance environments. Powerful theoretical background that supports operative collaboration in digital and technology driven projects.

Education.

Bachelor of Computer Science.

University of Rwanda - College of Science and Technology . Expected Graduation: 2026.

Pertinent Coursework.

- Database Management
- Web Development
- Software Engineering
- Data Structures & Algorithms
- Java Programming
- Python Programming
- Cybersecurity Fundamentals

Core Skills

Operations & Project Management

- Team coordination and collaboration
- Task organization and follow up
- Time management and prioritization
- Workflow coordination
- Attention to detail and accuracy
- Problem solving under pressure
- Stakeholder communication
- Documentation and reporting

Technical Skills

- Java, Python, JavaScript, HTML & CSS, PostgreSQL, Git & GitHub, VS Code, and IntelliJ IDEA.

Compressible Skills

- CommunicationL
- Leadership
- Adaptability
- Teamwork
- Accountability
- Fast learning
- serious thinking

Theoretical & Team Projects

Retail Management System Project

Team Coordinator & Backend Developer

- Collaborated in a multi-member university project involving frontend development , backend development, AI integration , and product design.
- Helped organize responsibilities according to team members' strengths to improve workflow efficiency.
- Coordinated communication among team members and followed up on project progress to ensure deadlines were respected.

- Contributed to backend development and system functionality implementation . Supported problem solving and team coordination during periods of project pressure and tight timelines.

Key Achievements

- Improved team coordination and task clarity.
- Successfully contributed to project completion within the necessary timeline.
- Strengthened communication and leadership skills in collaborative environments.

School Management System

Team Project -Admin Module Lead

Technologies: JSP, JSF , MySQL , ORM

- Collaborated in a team project to develop a School Management System designed to help schools manage students, grades, courses, and everyday operations digitally.
- Led the development of the admin module, focusing on student records management, course management, and administrative workflows.
- Coordinated responsibilities and communication within the team to improve workflow organization and project progress.
- Contributed to system structure, database integration, and functional functionality using MySQL and ORM technologies.
- Demonstrated leadership , teamwork, and attention to detail while working under project deadlines.

Key Contributions.

- Improved organization of administrative processes within the system.
- Strengthened project coordination and collaborative problem solving skills.
- Successfully contributed to the delivery of a functional multi-user management system.

Private Portfolio Website.

Full Stack private Project.

Technologies: React with JavaScript, FastAPI, Supabase, Vercel.

- Designed and developed an up to date susceptible private portfolio website using React with JavaScript for the frontend and FastAPI for backend services.

- Integrated Supabase for database and backend management.
- Managed project planning, deployment, testing, and maintenance independently. Deployed the application on Vercel with focus on usability , accessibility, and performance.
- Demonstrated self learning, project ownership, and structured development workflow.

Live Demo: <https://goslish.vercel.app>

Leadership & Team Experience

- Often took responsibility for organizing tasks and improving coordination during university group assignments.
- Helped teams maintain focus and thorough work efficiently under time pressure. prosperous communicating with team members, discussing challenges, and supporting collaborative problem solving.
- Demonstrated initiative in resolving workflow and communication issues during team projects.

Achievements

- Completed courses in Python Programming, JavaScript, and Cybersecurity.
- Existent GitHub contributor with academic and private projects.
- Participated in mathematics competitions during high school, strengthening discipline, analytic thinking, and confidence under pressure . Demonstrated powerful attention to detail and structured problem solving abilities.

Languages

- English: Fluent
- Kinyarwanda: Native

Interests

- Operations & Project Management
- Digital Business Operations
- Technology & Innovation
- Synthetic Intelligence
- Team Leadership
- Process Optimization
- Tech Communities & Collaboration
